OVERVIEW

Alison Deeth is an experienced senior lawyer in the Corporate practice. She has a wealth of experience advising clients in Australia and the United Kingdom in both local and multi-jurisdictional transactions.

Alison is experienced in advising energy sector business in Australia on matters which include power generation (including renewables), wholesale energy trading and contracting (physical commodity and derivative contracts for electricity including electricity retail sale), the development of energy storage technology, mining projects, gas trading, and energy and resources market regulatory reform and advisory work.

Alison has previously practiced in corporate restructuring and insolvency and has corporate governance and management experience in both Australia and the United Kingdom.

PROFESSIONAL BACKGROUND

Prior to joining the firm, Alison served as a corporate counsel at an independently owned electricity generation company in Queensland. In this role she worked closely with Queensland Government entities/GOCs, including CS Energy and the Department of State Development, Infrastructure and Planning.

- 10 August 2026, Electricity Market Participants on Notice: AER Releases Guidance on Automated Bidding and Third-Party Services

AREAS OF FOCUS

- Energy Assets and Transactions

INDUSTRIES

- Energy

REPRESENTATIVE EXPERIENCE

- Advised a confidential energy client on its ISDA agreements with an Australian trading bank and other energy market participants for electricity swap transactions.
- Advised EDF Renewables on the development of the Banana Range Wind Farm, including the development of the network infrastructure.
- Advised a confidential client on its embedded network arrangements and solar and BESS installations across its commercial and industrial, large residential and agricultural sites in the National Electricity Market (NEM) and the Wholesale Electricity Market in Western Australia (WEM).
- Advised a confidential client on the development of a renewable project in Tasmania including negotiating the connection and power offtake arrangements.
- Advised a South Korean client on its acquisition of solar and BESS projects in Queensland and Victoria.
- Advised CS Energy on its retail business compliance arrangements including for compliance with the National Energy Retail Law and Rules, its detailed compliance obligations register and training, and the CS Energy Alinta Energy retail joint venture to provide electricity to residential and small commercial customers in Southeast Queensland. Also advised CS Energy on generator obligations under the National Electricity Law and Rules relating to Projected Assessment of System Adequacy requirements and development of associated guidelines.
- Advised Queensland local council on a dispute related to the proposal, design and development of a geothermal power plant, which has ultimately produced no power or electricity revenue or savings.
- Advised Genuity (prev. InterGen) on a range of matters as part of its whole of business operation. This involved advising on Genuity's joint venture with CS Energy on the ownership and operation of the Callide C Power Station; leading the Australian in-house team on the transfer of UK, Dutch and US group companies to Australian management following the disposal of the UK parent company's assets (including due diligence processes, implementation of management services agreements, transfer of IT and HR systems and advice to the board on remaining liabilities); the negotiation and drafting of restructuring agreements for the proposed restructure of the Australian business; applications for Development Application amendments and working with the Department of State Development, Infrastructure and Planning; negotiation and drafting of electricity hedging agreements, electricity retail sale agreements and broker agreements. The work also involved agreeing responses to regulator enquiries regarding electricity market matters.
