OVERVIEW

Tim Hughes' practice focuses on electronic discovery and technology law and includes working on complex commercial litigation, arbitrations, and government and internal investigations. He creatively solves complex legal problems through technical means.

Tim assists with managing all aspects of the e-discovery process and regularly acts as a liaison between clients, trial counsel, review attorneys, vendors, and programmers.

EDUCATION

- J.D., Washington University School of Law, 2014
- B.A., University of Washington, 2010

ADMISSIONS

- Bar of Washington

AREAS OF FOCUS

- E-Discovery Analysis and Technology (e-DAT)
- International Arbitration

REPRESENTATIVE EXPERIENCE

- Represented global broadcasting and production company in complex employment internal investigation, leveraging Relativity aiR for Review and other artificial intelligence tools to conduct the investigation and identify key facts, issues, and documents efficiently.
- Represented construction company in multibillion-dollar international arbitration related to oil and gas refinery.

- Represented construction subcontractor in termination of contract dispute with EPC contractor in Hong Kong arbitration. Supported legal and expert teams, including the redfern process, exhibit identification and creation, and translation issues.
- Advised clients on technical legal compliance with website ADA standards.
